

Agile Methodology

Agile Approach:

The project followed an Agile methodology to ensure flexibility, collaboration, and continuous improvement. The Agile process allowed for iterative development and frequent adjustments based on feedback.

Key Agile Practices:

- Sprints: The project was divided into multiple sprints, each focusing on a specific phase (data collection, analysis, Power BI development).
- Daily Standups: Short daily meetings helped the team stay aligned and address blockers quickly.
- Sprint Reviews and Retrospectives: At the end of each sprint, feedback was gathered from stakeholders and the team to improve future sprints.
- Kanban Boards: Used for visual task management, allowing team members to see their progress.

Outcomes:

- By applying Agile, we successfully met key project milestones and ensured stakeholder satisfaction.
