

Team Coordination

Team Size:

85 students were involved in the data collection and analysis process across multiple semesters.

Task Breakdown:

- Data Collection: Each student was assigned a specific health-related topic for data collection.
- Data Analysis: Senior students were involved in analyzing the data collected from previous phases.
- Power BI Dashboard Development: Certain students were trained specifically to work on the dashboards.

Communication:

- Weekly meetings were held to track progress and address challenges.
- Task management was done using Wrike, where students could track their tasks and update progress.

Collaboration:

- Regular collaboration between students and project managers helped align goals and ensure that project milestones were met on time.
